**Attachments:** Control Slip AX-2681report.pdf; Incoming Correspondence 22-000-2681.pdf

Mark –

Please find a below a proposed email response to the AX that we received on Monday 3/7. It is due on 3/14. Per the note from Lakita, this can be sent by OD, DOD, or staff.

Dear Mr. Young –

Thank you for your email and your expression of concern regarding the devastating situation in Ukraine. These truly are very challenging times in and near Ukraine and around the world. The U.S. Department of State is the main government department responsible for U.S. foreign policy and leads our international engagement especially regarding the issues you reference in your email, should you wish to reach out there.

Thank you for your time and communication.

Best regards,

Mark Kasman

Director, Office of International Affairs  
U.S. Environmental Protection Agency

To: Regan, Michael [Regan.Michael@epa.gov]  
Subject: Putin's Nuclear Activation - Answer With Oil

Mr Regan,

Mr Putin's activating of nuclear forces for the Ukraines crisis requires a swift answer as the existing sanctions aren't working. America's answer should be flooding our allies with American oil and gas cutting off Russia at the knees. At least, American energy production is the cleanest available in the world (I can't imagine how dirty Russia's is.) Please advocate with Mr Biden for a change in policy.

Respectfully,  
Chris Young
